

Louisiana Renewal

[Click here for Registration Website](#)

Annual Check-Up

Schedule an appointment with your healthcare provider to discuss the continued use of medical marijuana for your condition.

Recertification by Provider

If still deemed necessary by your healthcare provider, they will recertify your eligibility for medical marijuana.

Update Dispensary Information

Inform your healthcare provider if you wish to continue using the same dispensary or choose a new one. Your provider will need this information to send your updated certification.

Provider Updates Recommendation

Your provider will update and send your renewed medical marijuana recommendation to the chosen dispensary through the state's prescription monitoring system.

Verification of Renewed Certification

The dispensary will verify your renewed certification and your identity to ensure everything is current.

Continue Purchasing Medical Marijuana

Once your renewal is verified, you can continue to purchase medical marijuana.

There is no state registration or card required in Louisiana. Patients are required to obtain an annual certification from their healthcare provider, who then sends the recommendation directly to the patient's chosen dispensary. This process simplifies access for eligible patients. Medical marijuana certifications are valid for one year from the date of issuance, and annual certification renewal is required.
